DETAILED ACTION

The first and second paragraph rejections made under the 112 paragraph are withdrawn in view of applicant's amendments to the claims and arguments made of record in Paper No. 28 dated November 19, 2002.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(a) and potential 35 U.S.C. 102(a) (if any).

Claims 1-2, 4-5, 8, 12-21, 23-26 and 28-30 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Davis et al (Davis 5,378,348).

Davis teaches a Fischer-Tropsch (F-T) distillate fraction, a process for producing said fraction, a blended fuel comprising said F-T distillate and a hydrocarbon that anticipates the instant claims, note abstract, column 1, lines 41 to column 2, line 68. Tables A, B and C, Examples 1-8 and Tables 1-8 and claims 1-11. If applicants deem the claims not to be anticipated then the claims are rendered obvious by Davis teachings for producing middle distillates transportation by a F-T process and its use as blending stock for jet and diesel fuels, note column 3, lines 41-44.

Applicant's arguments with respect to claims 1-2, 4-5, 8, 12-21, 23-26, and 28-30 have been considered but are moot in view of the new ground(s) of rejection.
